BASKET-BALL NEWS.

By Mrs. B. Hogbin.

On Wednesday night, 27th July, two
matches were played. In the first match Hondels
narrowly defeated Primrose. This match was very closely
contested, until, in the last round, Hondels slowly
forged ahead. Both of these teams are playing well,
considering that a lot of the original team members
have left for employment on the mainland. Only three
of the original Hondel's team remain. Primrose have
fared a little better, fielding six of the original
team.

The second match resulted in a draw
between Shadows and the Sugar Shacks. Here Sugar Shacks,
fielding only four of their regular team members, did
not play their usual high standard of game. Shadows
seemed to gain fresh heart, and put up one of the best
performances I have seen from this team.

Shadows have some very good
individual players, who can always be depended on to
play whole-heartedly to the final whistle.

HEALTH NOTES.
"Gingivitis."

Gingivitis or gum inflammation is
caused by neglect of mouth hygiene. Food particles help
to form tartar on the teeth. This should be regularly
removed by the dentist to prevent the gums becoming
tender and inflamed.

(From the Queensland Health Education
Council.)
