

Two interested spectators were two Christian Brothers visiting Father Malone and who had not seen this kind of entertainment before.

The patients thought the items were excellent and gave them a good reception. Following afternoon tea the party returned to the beach to await the flattie which would take them out to the boat.

The performers enjoyed the concert as well as the audience and the afternoon was considered well spent.

The boat arrived back at Palm Island about 6pm.

WOMENS BASKET-BALL

The girls have started up Basketball games again and there was a good showing at their fixture game during the week.

The teams all seem very keen and although a good deal of practice is required before they reach their peak it will not be long before they get into their stride.

The teams are 'Waratah' captained by Dorothy Seaton; 'Blue Jays' captained by Vernonica Noble; 'Hornets' captained by Vassa Johnson; 'Jacaranda' captained by Margaret Nardoo; Primrose captained by Nerida Allum; 'Wattles', who changed their names to 'Ravens' is captained by Mary Twaddle.

Basket Ball (Continued on P.3.)

It is noticed that some bright uniforms were worn by the teams and they make good showing on the court.

There are a number of young players in the teams this year and it will be interesting to see how they perform during the year.

With the approach of cooler weather there should be good attendances at these fixtures.

DANGER LURKS IN COLOURED PILLS

Every child stuffs things into his mouth. At an early age, the mouth is the most natural depository in the world to the child. Everything goes in) from food to fluff, sugar to sweets. And, if there are no sweets handy, parents 'brightly-coloured pills and tablets left carelessly lying about, are a good substitute. Or so thinks the toddler! In they go-and often tragedy results!

The urge for a toddler to put everything in its mouth is a natural one, so its isn't the 'urge' we have to try to cure. Nowad's there are many different kinds of pills and tablets available which are coloured attractively and which often resemble 'sweets' to the innocent eyes of the toddler. These pills are prescribed for many and various genuine ailments by doctors. So don't blame the pills!
