

cattle. Two Brahman bulls and some recently purchased heifers form the nucleus of a beef herd.

The new hospital at Yarrabah is functioning well and although much smaller than the Palm Island Hospital under construction, is bright and modern and adequate for the needs of the smaller population.

WOMEN'S BASKETBALL.

The Women's Basketball fixtures were completed last week and it is expected that the girls will wind up their year with their usual bright function and presentation of trophies.

The series has been a good one and thanks ~~once~~ due to Mrs. Bartlan, Mrs. Hogbin and Mrs. Brandis for their regular and untiring assistance at the matches.

The girls too have shown their enthusiasm by their regular attendance and by their well contested matches.

It has been a good season and the girls can well be proud of their tournament!

HEALTH NOTES.

PERSISTENT COUGH.

~~Honest~~ treatment of a persistent cough can be dangerous. It only postpones the medical examination it calls for.

Delay can be serious, for a persistent cough is a warning. Heed it by seeking a doctor's advice!!
